Management Discussion & Analysis
for the 3 months ended 30 September 2012

Key highlights
• Strong Q1 FY2013 financial performance:
  EBITDA of USD 74.1 million, up 64.2% y-o-y
• Financial results supported by strong first-quarter
  bulk oil sales volumes
• Record Q1 crushing volumes as a result of expanded capacities and
  sufficient opening balance of sunflower seed inventories
• Grain margin remains under pressure
• Strong margin earned on infrastructure assets

Taman deep water grain
 transshipment facility acquisition
• 50-50 joint venture formed with Renaisco BV, a subsidiary of Glencore
  International plc. The joint venture has acquired a 100% interest in a
  deep water grain export terminal in Taman port, Russia on September
  27, 2012 for the enterprise value of USD 265 million, including transac-
  tion costs, financed with a combination of equity and debt
• One of the largest deep water grain export terminals on Russia’s Black
  Sea coast, it is strategically located in close proximity to Southern
  Russia’s main grain producing region and will serve as a platform for
  the large-scale deployment of Kernel’s grain export business from
  Russia
• Installed throughput capacity of 3,000,000 tons of grains per annum
  (with future increase to 5,000,000 tons)
• Greenfield best-in-class facility commissioned in summer 2011

Other corporate
• 62,500 tons grain silo commissioned during Q1 FY2013
• Credit lines available as of 30 September 2012 stood at USD 1,588
  million versus USD 1,198 million as of 30 September 2011

FY2013 guidance confirmed*
• Revenue: USD 2,400 million
• EBITDA: USD 350 million
• Net Income: USD 215 million

(1) Hereinafter, EBITDA is calculated as a sum of the profit from operating activities plus amortization and depreciation
(2) EPS is measured in US Dollars per share, based on 79.5 million shares as of 30 September 2011 and 79.7 million shares as of 30 September 2012
(3) Net debt / EBITDA is calculated based on FY2012 EBITDA and EBITDA guidance for FY2013
(4) Adjusted net financial debt is the sum of short-term interest-bearing debt, current maturities of long-term interest-bearing debt and long-term interest-bearing debt, less cash and cash equivalents, marketable securities and readily marketable inventories. Adjusted net debt / EBITDA is calculated based on FY2012 EBITDA and EBITDA guidance for FY2013
(5) EBITDA/Interest is calculated based on 12 months trailing EBITDA and net finance costs

* Issued 29 October 2012
Overall, all of our major segments demonstrated solid performance in Q1 FY2013 with volumes driving quarterly EBITDA to USD 74.1 million.

**Bulk oil segment**
- The solid opening balance of sunflower seed inventories and lower maintenance period for crushing plants allowed us to increase crushing volumes by 60.2% y-o-y to 458,095 tons in Q1 FY2013. Combined with accumulated bulk oil inventories, our crushing volume growth allowed us to increase bulk oil sales by 89.3% y-o-y to 198,994 tons, which were delivered as usual to a diverse customer base across international markets.
- The margin in the bulk oil segment decreased in Q1 FY2013 compared to the margin posted in Q1 FY2012. At the same time, the margin remained relatively stable in absolute terms compared to the full-year figure at USD 191 per ton in Q1 FY2012 versus USD 201 per ton in the full FY2012, essentially reflecting that most of the first quarter contracts were concluded in the previous financial year.

**Farming segment**
- We posted good Q1 FY2013 financial results in our farming segment as sales consisted primarily of wheat and some minor volumes of other early crops, where harvest yields were largely in line with management expectations. Additionally, high grain prices supported the margin in the quarter under review.
- At the same time, we expect lower contribution from farming operations in FY2013 compared to the prior year results as yields of autumn crops (sunflower, soybean, corn) materially suffered by dry weather conditions.
- As usual, our farming segment sold most of the crops to our grain, oil and sugar segments at arm’s-length prices, with volumes earning additional margin through our supply chain.

**Grain segment**
- The sales volumes of our grain segment increased 22.2% y-o-y. The launch of grain exports from Russia positively contributed to the volume and margin.
- Overall, the margin remains relatively weak compared to general historical levels and we do not expect a trend reversal in FY2013. The season is difficult as lower than expected harvest in Ukraine and Russia combined with anticipation of export ban keep the trading margins under pressure.

**Silo services, export terminals segments**
- Grain volumes continue to be synergistic with our infrastructure – silo services and export terminals segments – which benefitted from higher utilization levels demonstrating solid margins. Export terminal throughput volumes are up 89.2% y-o-y to 740,126 tons, reflecting a faster pace of grain exports from Ukraine; margin improved on the higher turnover and respective fixed cost dilution.
- The silo services segment results are in line with management expectations. 62,500 tons new grain silo commissioned during the first quarter.

**Bottled oil segment**
- While the volume of bottled oil sales decreased in Q1 FY2013 compared to Q1 FY2012, the EBITDA margin remained strong of 17.1%.

**Sugar segment**
- Declining sugar prices forced us to build up inventories as sales volumes were insignificant in Q1 FY2013, translating into negative EBITDA as period-related operating expenses exceeded the top-line level.

Financial Highlights
for the 3 months ended 30 September 2012

Income statement highlights
- Revenues were up 32.2% y-o-y reaching USD 517.8 million in Q1 FY2013 fueled by robust sale volumes of bulk oil (up 89.3% y-o-y) and higher grain sales (up 22.2% y-o-y). Average prices for grains increased y-o-y owing to the reduced global supply resulting from abnormally volatile weather patterns, while vegetable oil prices continued to trade sideways over the last year following the correction in September 2011.
- Gross profit stood at USD 115.0 million in Q1 FY2013, up 48.7% y-o-y. Gross margin was up to 22.2% in Q1 FY2013 versus 19.7% in Q1 FY2012, the relative increase being the result of higher earnings delivered by our infrastructure assets and improved profitability in the grain segment versus Q1 FY2012.
- Other operating income, mostly represented by government grants attributable to the farming segment, was at USD 11.2 million in Q1 FY2013 versus USD 0.7 million in Q1 FY2012, up mainly on the larger farming operations and the absence of the one-time charge posted in Q1 FY2012.
- Distribution costs were USD 53.9 million in Q1 FY2013 versus USD 35.1 million in Q1 FY2012, a 53.2% y-o-y increase. Relative to revenue, distribution costs increased to 10.4% in Q1 FY2013 from 9.0% in Q1 FY2012, reflecting the shift in the delivery destination mix.
- General and administrative expenses totaled USD 17.4 million in Q1 FY2013 versus USD 11.9 million in Q1 FY2012. Relative to total company revenue, general and administrative expenses amounted to 3.4%, a slight increase over 3.0% in Q1 FY2012, due to a larger share of farming operations in the business structure following last year’s acquisitions which are currently being integrated. Profit from operating activities reached USD 54.9 million in Q1 FY2013 versus USD 31.0 million in Q1 FY2012, up 77.2% y-o-y. Operating profit margin recovered to 10.6% versus 7.9% a year ago.
- Finance costs were USD 19.8 million in Q1 FY2013 versus USD 12.3 million in Q1 FY2012. The 61.0% increase reflects larger sales volumes and generally higher soft commodities prices in Q1 FY2013 versus Q1 FY2012, which increased working capital requirements and consequently the financing needs.
- Foreign currency exchange gain is a cash item and attributable to a discrepancy between the interbank US Dollar to the Ukrainian hryvnia exchange rate and the official rate set by the National Bank of Ukraine. A gain of USD 9.1 million was posted in Q1 FY2013, versus USD 1.5 million in Q1 FY2012.
- Net profit attributable to the shareholders of Kernel Holding S.A. was USD 36.8 million in Q1 FY2013 versus USD 32.9 million for Q1 FY2012, translating into a net profit margin of 7.1%.

Cash flow highlights
- A mix of higher sales volumes and surging food prices resulted in a seasonal increase in the working capital level primarily driven by larger readily marketable inventories which translated into USD 157.9 million of cash used in operating activities in Q1 FY2013.
- Net cash used in investing activities was at USD 110.6 million in Q1 FY2013 in principal reflecting the cash paid for the 50% stake in the Taman deep-water grain transshipment terminal.
- All of the above translated into USD 343.4 million provided by financing activities in Q1 FY2013.

Liquidity and credit metrics highlights
- Net debt up to USD 907.3 million as of 30 September 2012 compared to USD 821.1 as of 30 September 2011, primarily reflecting USD 343.4 million increase in profitably pre-sold inventories, which are up due to earlier start of sunflower seed procurement activities, and faster pace grain exports in Q1 FY2013 compared to last year. Readily marketable inventories totaled USD 659.5 million covering 73% of the net debt as of 30 September 2012 compared to 68% coverage as of 30 September 2011.
- Net debt to EBITDA at comfortable 2.6x as of 30 September 2012, up from 1.6x as of 30 September 2011, attributing to higher level of inventories. Adjusted net debt to EBITDA (excluding readily marketable inventories) at 0.7x, up from 0.5x as of 30 September 2011 following the Taman acquisition during the quarter under review.
- Liquidity headroom improved to respond to higher grain prices. Credit lines available as of 30 September 2012 stood at USD 1,588 million compared to USD 1,198 million as of 30 September 2011.

These condensed consolidated financial statements were authorised for issue by the Board of Directors of Kernel Holding S.A. on 26 November 2012.
### 2. Change in Issued Capital

Since 15 June 2005, the holding company of the Group is Kernel Holding S.A. (Luxembourg) (the ‘Holding’), whose issued capital as of 30 September 2012 consisted of 79,683,410 ordinary bearer shares without indication of a nominal value, provided 79,683,410 voting rights (as of 30 September 2011 – 79,683,410 shares).

The shares were distributed as follows:

As of 30 September 2012 and 2011, 100% of the beneficial interest in the ‘Major Equity holder’ was held by Verevskiy Andrey Mikhaylovich (hereinafter the ‘Beneficial Owner’).

In order to perform an initial public offering of the shares of the Group on the Warsaw Stock Exchange (‘WSE’), the general meeting of shareholders resolved to split the existing shares of the Group at a split ratio of one to five thousand (1:5,000) and to consequently split the existing nine thousand three hundred and thirty-four (9,334) shares of the Group without indication of a nominal value into 46,670,000 (forty-six million six hundred and seventy thousand) shares of the Group without indication of a nominal value.

On 23 November 2007, the Holding was listed on the Warsaw Stock Exchange. The total size of the Offering was PLN 546,402,000, comprising 22,766,750 shares, of which 16,671,000 were newly issued shares.

On 27 June 2008, an additional 5,400,000 ordinary bearer shares of the Group were admitted to trading on the main market of the WSE.

On 3 June 2010, Kernel issued 4,450,000 new shares, thereby increasing the Group’s share capital by USD 117,506.70, to a total amount of USD 1,932,681.54. Following the issuance of new shares, Kernel’s share capital was divided into 73,191,000 shares without indication of a nominal value, giving right to 73,191,000 voting rights at the General Meeting of the Group.

On 5 January 2011, Kernel issued 483,410 new shares without indication of a nominal value. All of the newly issued shares were subscribed by a stock option beneficiary under the management incentive plan. The issue price of 1 share was PLN 24. As a result of the increase, the Company’s share capital was increased by USD 12,764 and set at USD 1,945,446.46, divided into 73,674,410 shares without indication of a nominal value.

On 30 March 2011, Kernel Holding S.A. announced its intention to issue approximately five million new ordinary shares of the Company through an offering to institutional investors (‘the Offering’). The Offering was conducted through an accelerated book offering which, closed on 31 March 2011. The allocations to institutional investors were announced on 1 April 2011, whereby 5,400,000 ordinary shares were placed at a price of PLN 74 per share. The Offering raised gross proceeds of PLN 399.4 million for the Company. In order to ensure that allottees in the Offering could receive and trade their allocations immediately, Namsen Limited, a company controlled by Andrey Verevskiy, lent shares in Kernel for the purpose of the settlement of shares. The respective capital increase was adopted on 21 July 2011 at the Extraordinary General Meeting of Kernel Holding S.A. Shareholders.

On 4 August 2011, Kernel issued 6,009,000 new shares without indication of a nominal value, 5,400,000 newly issued shares have been subscribed by Namsen Limited. The remaining newly issued shares have been subscribed by holders of stock options issued in connection with the Company’s management incentive plan. As a result of the increase, the Company’s share capital was set at USD 2,104,120.11 divided into 79,683,410 shares without indication of a nominal value.

Luxembourg companies are required to allocate to the legal reserve a minimum of 5% of the annual net income until this reserve equals 10% of the subscribed issued capital. This reserve of an amount of USD 125,000 as of 30 September 2012, unchanged from 30 September 2011, may not be distributed as dividends.

### 3. Basis of Presentation of Financial Statements and Summary of Significant Accounting Policies

These condensed consolidated financial statements for the 3 months ended 30 September 2012 have been prepared in accordance with International Accounting Standard 34 Interim Financial Reporting, and do not include all of the information and disclosures required in the annual financial statements. The accounting policies and methods of computation adopted in the preparation of the condensed consolidated financial statements are the same as those followed in the preparation of the Group’s annual financial statements for the year ended 30 June 2012.

**Interests in joint ventures**

A joint venture is a contractual arrangement whereby the Group and other parties undertake an economic activity that is subject to joint control.

The results and assets and liabilities of joint ventures are incorporated in these consolidated financial statements using the equity method of accounting, except when the investment is classified as held for sale, in which case it is accounted for in accordance with IFRS 5 Non-current Assets Held for Sale and Discontinued Operations. Under the equity method, an investment in a joint venture is initially recognised in the consolidated statement of financial position at cost and adjusted thereafter to recognise the Group’s share of the profit or loss and other comprehensive income of the joint venture.
Notes to the Condensed Consolidated Financial Statements (continued)

3. Basis of Presentation of Financial Statements and Summary of Significant Accounting Policies (continued)

Any excess of the cost of acquisition over the Group’s share of the net fair value of the identifiable assets, liabilities and contingent liabilities of an joint venture recognised at the date of acquisition is recognised as goodwill, which is included within the carrying amount of the investment. Any excess of the Group’s share of the net fair value of the identifiable assets, liabilities and contingent liabilities over the cost of acquisition, after reassessment, is recognised immediately in profit or loss.

The requirements of IAS 39 are applied to determine whether it is necessary to recognise any impairment loss with respect to the Group’s investment in a joint venture. When necessary, the entire carrying amount of the investment (including goodwill) is tested for impairment in accordance with IAS 36 Impairment of Assets as a single asset by comparing its recoverable amount (higher of value in use and fair value less costs to sell) with its carrying amount. Any impairment loss recognised forms part of the carrying amount of the investment. Any reversal of that impairment loss is recognised in accordance with IAS 36 to the extent that the recoverable amount of the investment subsequently increases.

When a group entity transacts with its joint venture, profits and losses resulting from the transactions with the joint venture are recognised in the Group’s consolidated financial statements only to the extent of interests in the joint venture that are not related to the Group.

The exchange rates used in preparation of these financial statements are as follows:

Operating segments are reported in a manner consistent with the internal reporting as provided to the chief operating decision makers, including Management and the members of the Board of Directors of the Group, to allocate resources to each segment and for performance assessment.

Segments in the consolidated financial statements are defined in accordance with the type of activity, products sold, or services provided. The operating segments’ activities are as follows:

<table>
<thead>
<tr>
<th>Operating segments</th>
<th>Activities</th>
</tr>
</thead>
<tbody>
<tr>

The measure of profit and loss and assets and liabilities is based on the Group Accounting Policies which are in compliance with the IFRS.

In the financial statements as of 30 September 2012, the segment table reflects continuing operations only.

The reconciliation eliminates intersegment items and reflects income and expenses that cannot be attributed to segments.

Segment data is calculated as follows:

Intergroup transactions are recorded at the arm’s length basis. Capital expenditures, amortisation and depreciation related to property, plant and equipment and intangible assets are allocated to segments when possible.

Since financial management of Group companies is centralized, financial liabilities are not allocated directly to respective operating segments. Consequently, the liabilities shown for individual segments exclude financial liabilities.

The operating segments have different seasonality patterns. Bottled oil and oil in bulk segments do not have pronounced seasonality in earnings, but are highly seasonal in terms of working capital requirements. The highest level of working capital is required in December – April, when the Group has significant raw material in storage.

The grain segment has the same seasonal requirements in working capital in December – April and the lowest revenues routinely in the fourth quarter of the Group’s financial year (ending on 30 June).

The farming segment, in the first half of the Group’s financial year due to seasonality and the implications of IAS 41, mainly reflects the sale of crops and the effects of the revaluation of agri produce carried forward, while financial performance during the second half of the financial year reflects the effects of the revaluation of biological assets and the sale of carried-forward agri produce.

The sugar segment is highly seasonal, as sugar plants normally operate during September – December processing sugar beets harvested in September – November. Higher revenue is typically expected in second half of financial year when carried forward sugar stock is gradually sold.

8. Income Tax

The Parent is subject to corporate income tax in Luxembourg. The tax rate in Luxembourg was 22.05% as of 30 September 2012 and 30 September 2011. The corporate income tax rate in Ukraine, where the main operation of the Group is located, was 21% as of 30 September 2012 and 23% as of 30 September 2011.

The new Tax Code of Ukraine, which was enacted on 2 December 2010, introduced a gradual decrease in income tax rates from 23% effective 1 April 2011 to 16% effective 1 January 2014, as well as certain changes to the rules of income tax assessment effective 1 April 2011. Consequently, the deferred income tax assets and liabilities as of 30 September 2012 were measured based on the revised income tax rates of the new Tax Code.

The components of the income tax (charge)/benefit for 3 months ended 30 September 2012 and 2011 were as follows:

Income tax recognised in profit or loss:

<table>
<thead>
<tr>
<th>3 months ended 30 September 2012</th>
<th>3 months ended 30 September 2011</th>
</tr>
</thead>
<tbody>
<tr>
<td>Current income tax charge</td>

</tr>
<tr>
<td>Income tax benefit reported in the income statement</td>
<td>226</td>
</tr>
<tr>
<td>Income tax (charge)/benefit</td>
<td>(2,441)</td>
</tr>
</tbody>
</table>

The income tax (charge)/benefit is reconciled to the profit before income tax per condensed consolidated income statement as follows:

<table>
<thead>
<tr>
<th>3 months ended 30 September 2012</th>
<th>3 months ended 30 September 2011</th>
</tr>
</thead>
<tbody>
<tr>
<td>Profit before income tax from continuing operations</td>

<tr>
<td>Tax effect of expenses not deductible for tax purposes, net</td>
<td>5,964</td>
</tr>
<tr>
<td>Income tax (charge)/benefit</td>
<td>(2,441)</td>
</tr>
</tbody>
</table>

As of 30 September 2012, based upon projections for future taxable income over the periods in which the deductible temporary differences are anticipated to reverse, management believes it is probable that the Group will realise the benefits of the deferred tax assets of USD 6,842 thousand recognised in respect of tax losses carried forward by Group Subsidiaries. The amount of future taxable income required to be generated by Group subsidiaries to utilise the tax benefits associated with net operating loss carry forwards is approximately USD 34,616 thousand. However, the amount of the deferred tax assets considered realisable could be adjusted in the future if estimates of taxable income are revised.
8. Income Tax (continued)

The major components of deferred tax assets and liabilities were as follows:

**DEFERRED TAX ASSETS ARISING FROM:**
- Valuation of accounts receivable: 11,456 (2012), 1,366 (2011)
- Tax losses carried forward: 6,842 (2012), 3,348 (2011)
- Valuation of inventory: 1,573 (2012), - (2011)
- Valuation of accrued expenses and other temporary differences: 5,367 (2012), 2,208 (2011)

Deferred tax assets: 25,788 (2012), 11,270 (2011)

**DEFERRED TAX LIABILITY ARISING FROM:**
- Valuation of property, plant and equipment: (24,710) (2012), (28,469) (2011)
- Valuation of intangible assets: (1,081) (2012), (2,064) (2011)
- Valuation of other temporary differences: (4,718) (2012), (15) (2011)

Transactions with related parties are performed on terms that would not necessarily be available to unrelated parties.

As of 30 September 2012, the Board consists of the following seven directors: the Chairman of the Board, two independent directors, and four directors employed by Subsidiaries.
9. Transactions with Related Parties (continued)
Remuneration of the Board (7 Directors) for the 3-month period ended 30 September 2012 amounted to USD 220 thousand (for the 3-month period ended 30 September 2011: 6 Directors amounted to USD 172 thousand).

The Chairman of the Board and four directors employed by Subsidiaries are not entitled to remuneration for their services as Board members but are refunded, to a reasonable extent, for any expenses incurred by them in performing their duties, including reasonable travelling expenses. Four directors employed by Subsidiaries are entitled to remuneration for their services as members of the Management Team of the Group. Remuneration of the Management Team of the Group, totaling 14 people, amounted to USD 450 thousand for the 3-month period ended 30 September 2012 (3-month period ended 30 September 2011: 14 people, amounted to USD 478 thousand).

The Members of the Board of Directors and the Management Team members are not granted any pensions or retirement or similar benefits by the Group.

10. Commitments and Contingencies
In the ordinary course of business, the Group is subject to legal actions and complaints. As of 30 September 2012, the Group’s companies had ongoing litigations with the tax authorities mainly related to the disallowance of certain amounts of VAT refunds claimed by the Group, the deductibility of certain expenses for corporate income tax purposes and other tax issues. According to the assessment performed by the management of the Group, the maximum exposure of the Group to such risks as of 30 September 2012 amounted to USD 75,982 thousand. Out of this amount, USD 30,787 thousand relates to cases where court hearings took place and where the court in either the first or second instance has already ruled in favor of the Group. Management believes that based on the past history of court resolutions of similar lawsuits by the Group, it is unlikely that a significant settlement will arise out of such lawsuits and no respective provision is required in the Group’s financial statements as of the reporting date.

Capital Commitments
As of 30 September 2012, the Group had commitments under contracts with European and Ukrainian suppliers for a total amount of USD 781 thousand for the supply of equipment and services required for the construction of a new silo and USD 1,051 thousand for the supply of equipment and services required for the new solvent extraction plant under construction.

As of 30 September 2011, the Group had commitments under contracts with European and Ukrainian suppliers for a total amount of USD 7,000 thousand for the supply of equipment and services required for the construction of a new silo.
